SUMMARY

I am a driven professional with broad technical skill set and involved in web development using the interpreter programming languages. Excellent communicator experienced in interpreting and implementing business concepts into IT solutions. Known for ability to multi-task, learn fast and juggle multiple pressing projects simultaneously, meeting all deadlines. Thrives through new challenges and constantly updates myself on new technologies and trends.

Having over 8.5 years of experience is mostly working on PYTHON, DJANGO, AWS, Flask, FastAPI, HTML, React and Databases like MySql and DynamoDB. I also participate in every step of web development life cycle process to make user experience better.

SKILLS

- Experience in web development using Python and Django, FastAPI Framework.
- Experience in developing User Interface using HTML**,** CSS, JAVASCRIPT, React**.**
- Experience in AWS services – Lambda, SQS, SNS, DynamoDB, API Gateway, EventBridge, S3.
- Experience in Relational Database programming and writing queries in SQL, MYSQL.
- Experience in writing Scripts with python.
- Experience in working with EXCEL, CSV files by using Python Modules.
- Experience in tools such as GIT, JIRA, REVIEW BOARD, BOTO3, JENKINS.
- Experience in webscrapping with BeautifulSoap, Urllib2, request modules.
- Familiarity with agile development methodology.
- Good Knowledge on Object Oriented Programming and web services.
- Have excellent analytical, problem solving, and interpersonal communication skills.
- Ability to learn and adapt to new technologies.
- Have knowledge on Apigee.

ACADEMIC SUMMARY

- MCA at KMMITS(SVU) in 2016
- BSC (Computer Science) at Sri Vaishnavi Degree College(YVU) in 2013.
- Higher Secondary , 2010.
- High School , 2008.

EMPLOYMENT DETAILS

1. Working as a Senior Software Engineer in **Impelsys India Pvt Ltd** from April-2026 to till date at Bangalore.
2. Working as a Senior Software Associate in **Cognizant Technology Solutions India Pvt Ltd** from Mar-2022 to Mar-2026 at Bangalore.
3. Worked as a Software Engineer in **ITC Infotech** from Nov-2020 to Mar-2022 at Bangalore.
4. Worked as a Python Developer in **One Delta Synergies Pvt Ltd/Quant LegalTech India Pvt Ltd** from Jan-2018 to Nov-2020 at Bangalore

TOOLS

- Programming Languages : Python
- Frontend Technologies : Html, Css, Java Script, React
- Web frameworks : Django, Flask, FastAPI
- Database systems : Sql, MySql, DynamoDB
- Tools : Pycharm, VSCode, Git, Jira, Aws
- Operating Systems : Linux , Windows

PROJECT DETAILS

PROJECT :1

Project Name : RIVIR Migration
Tools : Python, AWS, FastAPI, Airflow
Team size : 4
Role : Data Engineer
Duration : Apr-2026 to till date

Description:

RIVIR Migration project focused on modernizing legacy systems into **cloud-native architecture** on AWS. The solution involves backend development with **Python and FastAPI**, workflow orchestration using **Apache Airflow**, and deployment of scalable, serverless applications on AWS. The project ensures improved performance, reduced operational costs, and seamless transition of business-critical applications.

Responsibilities :

- Designed and implemented **FastAPI-based microservices** for backend services.
- Developed and scheduled **Airflow DAGs** for workflow automation and data pipeline orchestration.
- Deployed applications on **AWS serverless infrastructure** ensuring scalability and cost efficiency.
- Collaborated with cross-functional teams to ensure smooth migration and minimal downtime.
- Optimized cloud resource usage and improved monitoring for production workloads

PROJECT :2

Project Name : Accident Management
Tools : Python, AWS, FastAPI, Flask
Team size : 7
Role : Python Developer
Duration : May-2022 to till date

Description :

Accident Management is an integrated accident scene management application that streamlines communication and coordination among multiple service providers, including third parties, repair shops, and storage yards, all accessible from one central platform. This comprehensive system, which incorporates partner APIs, manager APIs, and a case processor, facilitates accident management and handles crash notifications such as ASM, VRM, and ACN. Leveraging Agero, Inc.'s expertise in connected vehicles, roadside assistance, and claims management, our solution offers a range of services including safety features, data analysis, navigation, and accident scene management.

Additionally, a Billing Service microservice communicates with the Agero billing system and AM Gateway, managing information exchange and utilizing AI for billing data retrieval. AWS Event Bridge facilitates billing notifications, triggering a lambda function to store records in a DynamoDB table upon receipt. Furthermore, an Image Processor component processes images received from various service providers' mobile apps, identifying image types and extracting location data to determine the incident's location.

Responsibilities :

- Easy integration with your enterprise solutions
- Developed Smooth case approval and execution
- Managing regular updates and status of Cases
- Developed a mechanism for identifying the fraud address
- Developed the Smart Activity Dashboard
- Uploading the vehicle accident images through system
- Calling third party API to confirm the accident by seeing images
- Implement the Multi assignment functionality

PROJECT :3

Project Name	**:**	SIS(Student Information System)
Tools	**:**	Django, Python, Kafka
Team size	**:**	20
Role	**:**	Associate IT Consultant
Duration	**:**	Nov-2020 to Mar-2022

Description :

Student Management System is software which is helpful for students as well as the school authorities. It is to allow the administrator of any organization to edit and find out the personal details of a student and the student to keep up to date his profile. In the current system all the activities are done manually. It is very time consuming and costly. Our Student Management System deals with the various activities related to the students. The main purpose of this SRS document is to illustrate the requirements of the project Student information System and is intended to help any organization to maintain and manage its student’s personal data.

Responsibilities :

- Experienced with AWS Kafka Consumers and Producers.
- Worked on the Permissions like Global-Level, User-Level and Object-Level.
- Worked on the Feeder to update data in models by using Management Commands.
- Writing a Unit Test cases based on the requirements.
- I was involved in Restfull web services.

PROJECT :4

Project Name	**:**	Contractum
Tools	**:**	Django, Python, HTML, AWS
Team size	**:**	8
Role	**:**	Python Developer
Duration	**:**	Apr-2019 to Oct-2020

Description :

Contractum is a leading contract management software solution, that lets you experience flawless tracking during the entire contract management lifecycle. Contractum is a vital addition to your regulatory compliance software. It offers a simple interface and ease of use enabling you to manage and control your complete contract workflow. Contractum is an intelligent contract authoring platform and is a smart choice. Supports all document formats like email, word, pdf, jpeg etc.

Responsibilities :

- Easy integration with your enterprise solutions
- Developed Smooth contract approval and execution
- Managing regular updates and status of contracts
- Developing Email based workflow.
- Provides streamlined document management
- Handling Unicode issues while tool receiving the data from client
- Developed templates based contract generation workflow and email based contract generation.
- Developed Version controlling system for giving a complete contract history.

PERSONAL PROFILE

Gender	**:**	Male
Date of Birth	**:**	15-March-1993
Languages Known	**:**	English, Hindi and Telugu

DECLARATION

I hereby declare that the particulars mentioned in the resume are best of my knowledge and belief.
